## 1 Number theory

## 1.1 Count primes up to N

```

// To initialize, call init_count_primes() first.
// Function count_primes(N) will compute the number of prime numbers lower
// than
// or equal to N.
//
// Time complexity: Around  $O(N^{0.75})$ 
//
// Constants to configure:
// - MAX is the maximum value of  $\sqrt{N} + 2$ 
bool prime[MAX];
int prec[MAX];
vector<int> P;
llint rec(llint N, int K) {
    if (N <= 1 || K < 0) return 0;
    if (N <= P[K]) return N-1;

    if (N < MAX && llint(P[K])*P[K] > N) return N-1 - prec[N] + prec[P[K]];
    const int LIM = 250;
    static int memo[LIM*LIM][LIM];
    bool ok = N < LIM*LIM;
    if (ok && memo[N][K]) return memo[N][K];
    llint ret = N/P[K] - rec(N/P[K], K-1) + rec(N, K-1);
    if (ok) memo[N][K] = ret;
    return ret;
}

llint count_primes(llint N) {
    if (N < MAX) return prec[N];
    int K = prec[(int)sqrt(N) + 1];
    return N-1 - rec(N, K) + prec[P[K]];
}

void init_count_primes() {
    prime[2] = true;
    for (int i = 3; i < MAX; i += 2) prime[i] = true;
    for (int i = 3; i < MAX; i += 2) if (prime[i])
        for (int j = i+i; j < MAX; j += i+i)
            prime[j] = false;
    REP(i, MAX) if (prime[i]) P.push_back(i);
    FOR(i, 1, MAX) prec[i] = prec[i-1] + prime[i];
}

```

## 1.2 Extended Euclide

```

int bezout(int a, int b) {
    // return x such that ax + by == gcd(a, b)
    int xa = 1, xb = 0;
    while (b) {
        int q = a / b;
        int r = a - q * b, xr = xa - q * xb;
        a = b; xa = xb;
        b = r; xb = xr;
    }
    return xa;
}

pair<int, int> solve(int a, int b, int c) {
    // solve ax + by == c
    int d = __gcd(a, b);
    int x = bezout(a, b);
    int y = (d - a * x) / b;
    c /= d;
    return make_pair(x * c, y * c);
}

```

## 7 Miscellaneous

### 7.1 RNG

```

mt19937 rng(chrono::steady_clock::now().time_since_epoch().count());
//use mt19937_64 if we want 64-bit number

```

### 7.2 SQRT forloop

```

for (int i = 1, la; i <= n; i = la + 1) {
    la = n / (n / i);
    //n / x yields the same value for i <= x <= la.
}

```
